Capitalism is killing the planet. We face escalating ecological crises, unending wars and occupations from Iraq and Afghanistan to the U.S.-backed Israeli assaults on Palestine, racism in the form of mass incarceration and out-of-control anti-immigrant bigotry, and rising levels of misogyny and homophobia. All of this in pursuit of profit. Enough is enough!

Come join the International Socialist Organization for a discussion on how we can build a movement to get rid of capitalism and what you can do to help.
